I am a Frontend Developer who develops modern and scalable web interfaces that prioritise user experience. I aim to produce simple, fast and accessible solutions by working with current technologies such as React.js, JavaScript and Tailwind CSS. I aim to contribute to quality software development processes with my open structure and attention to detail.

AREAS OF EXPERTISE

- React
- Next.js
- JavaScript
- TypeScript
- Node.js
- Git & Github
- Tailwind CSS
- MySQL
- API Integration

PROFESSIONAL EXPERIENCE

Strajedi   **Istanbul , Turkiye**
Front-End Developer Intern

- I developed responsive and high-performance user interfaces using React.js, JavaScript and CSS.
- I applied DOM manipulation techniques to improve web application performance.
- I collaborated with UX/UI teams to translate user and business needs into functional front-end designs.
- I worked within Agile/Scrum frameworks.

hub.studio   **Istanbul , Turkiye**
Front-End Developer Intern

- I designed and developed interactive web applications using React.js, Redux and JavaScript.
- I created optimized user interfaces with Tailwind CSS.
- I used integrated RESTful APIs for real-time updates and enhanced user interactions.
- I contributed to agile workflows by participating in daily stand-ups and sprint planning.

EDUCATION

Istanbul Medeniyet University
Computer Engineer   GNO:3.21/4

- I gained knowledge in the field of Full-Stack Web Development with a focus on Frontend and Backend technologies.
- I completed Algorithms, Data Structures, Software Engineering and Database Management Systems courses.
- I applied Agile methodologies by developing React.js, Node.js projects.

PROJECTS

Blur Face
- Developed the frontend of an image processing application using Django.
- Integrated image processing algorithms into the website.
- Enhanced user experience by implementing a responsive design.

Property Website
- Developed a full stack web application for property management using React.js, Node.js, and MySQL.
- Successfully managed listing operations through efficient CRUD operations.

Organisation Website
- I developed a vibrant and user-friendly website for organisation planning.
- Built using Next.js with EmailJS integration for contact form functionality.
- It offers personalised booking packages and online booking features to increase user interaction and booking experience.

PAE Website
- I developed a web application optimised with Next.js using Tailwind CSS and HTML5.
- I coordinated with UI/UX teams to ensure timely completion of projects.

Now Yapi Website
- I developed a frontend based on React.js, integrated responsive designs with Tailwind CSS.
- I created interactive sliders using Swiper.js, increasing visual appeal and user interaction.
- By organising API communication with JSON data integration, I ensured that the necessary data is pulled smoothly.
